Re: Mustang Challenge Helmet & Head Restraint Inspections

Per 2024 IMSA Sporting Regulation Art. 21.2, all Driver helmets must be inspected by IMSA Officials prior to first use in the season. Helmets must display the required IMSA inspection sticker. The 2024 Helmet sticker indicates the helmet is compliant with the FIA 8860 standard and is equipped with the Eject System or Stand 21 "Lid Lifter" system. The helmet inspection does not address the safety condition of the helmet.

In addition, the Driver Head & Neck Restraint used during this Event must be presented with the Driver Helmet for inspection. The designated inspection of this equipment is on Thursday, June 6, during the Safety Inspection period of 8:30 am until 5:00 pm at the Mustang Challenge Tech Transporter.

If the equipment is not available during the Safety Inspection period, a Team representative must notify an IMSA Official or IMSA Field Investigator when the helmet and neck restraint will be available for inspection. It is the responsibility of the Team to set up a time and location for this inspection if the above times cannot be met. All Driver helmets and neck restraints must be inspected prior to the first on track Session of the Event.

For questions, please contact Robert Bosworth, IMSA Field Investigator at (704) 728-8087 or rbosworth@imsa.com.
